

DIGESTIVE FEED ADDITIVE

A NUTRITIONAL AID TO SUPPORT DIGESTION FOR CATTLE, GOATS AND SWINE

GUARANTEED ANALYSIS (per 1 oz. scoop)

- Crude Protein (min): 12% (3,400 mg)
- Crude Fat (min): 6% (1,700 mg)
- Crude Fiber (max): 6% (1,700 mg)
- Calcium (min): 9% (2,550 mg)
- Calcium (max): 10% (2,835 mg)
- Copper (min): 85 ppm (2.4 mg)
- Zinc (min): 470 ppm (13.3 mg)
- Manganese (min): 220 ppm (6.2 mg)
- Cobalt (min): 8 ppm (0.22 mg)
- Saccharomyces cerevisiae (min): (12.4 billion cells)
- Lactobacillus acidophilus (min): (283 million CFU)
- Enterococcus faecium (min): (283 million CFU)

FEEDING DIRECTIONS

dac® DIGESTIVE FEED ADDITIVE can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals. **dac**® DIGESTIVE FEED ADDITIVE can be fed to all classes of large ruminants. Feed **dac**® DIGESTIVE FEED ADDITIVE at the following rates:

Maintenance:

- Goats & Pigs – 1 scoop (ounce)/animal/day
- Calves – 1 scoop (ounce)/animal/day
- Mature Cattle – 2 scoops (ounces)/animal/day

Stress Associated with Show or Sale:

- Goats & Pigs – 2 scoops (ounces)/animal/day
- Calves – 2 scoops (ounces)/animal/day
- Cattle – 4 scoops (ounces)/animal/day

**THIS PRODUCT CONTAINS ADDED COPPER
DO NOT FEED TO SHEEP.**

SPECIAL INGREDIENTS

dac® DIGESTIVE FEED ADDITIVE provides a nutritional aid to support digestion for Ruminants. **dac**® DIGESTIVE FEED ADDITIVE is enhanced with Probiotics.

Yea Sacc®1026 - is a live yeast culture derived from the specific yeast strain *Saccharomyces cerevisiae* 1026. **Yea Sacc**®1026 increases fiber, phosphorus and calcium digestibility in animals, and increases gross energy, total lipids and amino acid absorption. **Yea Sacc**®1026 Improves milk availability to animals if administered for 3-4 weeks before and throughout the lactation period.

Bio-available Minerals – or chelated minerals are those that have been bonded to two or more amino acids. A mineral in this chelated state allows easy passage through the intestinal wall into the blood resulting in increased metabolism of that mineral. **dac**® DIGESTIVE FEED ADDITIVE utilizes organic minerals to increase availability and enhance absorption rates.

Bio-Mos® - is derived from a specific strain of yeast and improves animal performance. Gastrointestinal (GI) health and integrity is essential for animal performance and **Bio-Mos**® 'feeds the GI tract' and thus plays a critical role in animal nutrition and performance.

Integral® A+ - is a natural solution to help animals achieve their true potential. Its highly successful technology has proven efficacy in over 55 peer-reviewed in-vivo trials in poultry, livestock, companion animals and aquaculture. Integral has been awarded three patents which protect its novel composition and methods of production.

Probiotics - These natural additives help maintain the correct balance of microflora in the digestive system to help nutrients be completely digested.

INGREDIENTS

Distillers dried grains with solubles, calcium carbonate, brewers dried yeast, yeast culture, hydrolyzed yeast, corn oil, dried *Lactobacillus acidophilus* fermentation product, dried *Enterococcus faecium* fermentation product, zinc methionine complex, zinc proteinate, manganese proteinate, copper proteinate, cobalt proteinate, choline chloride, dextrose, sodium aluminosilicate, hydrated sodium calcium aluminosilicate, and natural and artificial flavor.
