

Total Performance Plus

FEATURES

- Bio-available Trace Minerals
- Joint protection
- Organic Selenium
- Essential Amino Acids
- Enhanced with Probiotics
- Beneficial Bacteria
- Biotin-3.75 mg/ounce
- Plus Joint Support

dac® TOTAL PERFORMANCE PLUS provides a balanced vitamin and mineral profile for high performance horses & elite equine athletes. **dac® TOTAL PERFORMANCE PLUS** is enhanced with JOINT SUPPORT ingredients.

INGREDIENTS

Soybean meal, alfalfa meal, soybean oil, dry whey product calcium carbonate, monosodium phosphate, potassium chloride, choline chloride, zinc proteinate, manganese proteinate, copper proteinate, cobalt proteinate, iron proteinate, selenium yeast, d-alpha tocopherol acetate (source of natural vitamin E), vitamin A supplement, vitamin D3 supplement, menadione sodium bisulfate complex (source of vitamin K activity), zinc sulfate, magnesium oxide, ferrous sulfate, manganese sulfate, cobalt sulfate, biotin, vitamin B-12 supplement, folic acid, niacin supplement, calcium pantothenate, riboflavin supplement, ascorbic acid, thiamine hydrochloride, pyridoxine hydrochloride, ethylenediamine dihydroiodide, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dextrose, and sodium aluminosilicate, methylsulfonylmethane, glucosamine hydrochloride, glucosamine sulfate, chondroitin sulfate, ascorbic acid, shark cartilage, sodium hyaluronate and natural and artificial flavor.

AVAILABLE SIZES:

- 5# Bucket • 20# Bucket
- 40# Bag

Vitamins & Minerals

GUARANTEED ANALYSIS

(Per Scoop – 1 ounce)

Crude Protein (min)	8% (2270 mg)
Crude Fat (min)	.4% (1135 mg)
Crude Fiber (max)	15% (4250 mg)
Calcium (min)	.7% (1980 mg)
Calcium (max)	8.5% (2400 mg)
Phosphorus (min)	2.5% (700 mg)
Iron (min)	3000 ppm (85 mg)
Zinc (min)	2500 ppm (70 mg)
Manganese (min)	1400 ppm (39 mg)
Copper (min)	465 ppm (13 mg)
Selenium (min)	25.5 ppm (0.7 mg)
Vitamin E	2000IU/lb (125IU)
MSM	(2800 mg)
Glucosamine (Shellfish)	(1320 mg)
Chondroitin Sulfate (Porcine)	(330 mg)
Sodium Hyaluronate	(50 mg)
Biotin	(3.75 mg)

FEEDING DIRECTIONS

dac® TOTAL PERFORMANCE PLUS can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals and require a lower feeding rate of **dac® TOTAL PERFORMANCE PLUS**. Feed **dac® TOTAL PERFORMANCE PLUS** at the following rates:

Light Exercise:	2 scoops (2 ounces) per horse per day if fed with unfortified grains.
Moderate to Heavy Exercise	3 scoops (3 ounces) per horse per day
Very Heavy Exercise	4 scoops (4 ounces) per horse per day.

Feeding rate based on 1000 lb. horse.

SPECIAL INGREDIENTS

SEL-PLEX®

Organic Selenium - Selenium is an essential nutrient that plays a critical role in metabolism, healthy growth, reproductive health, and immunity. It also acts as a powerful antioxidant to prevent fatty acid oxidation which can cause tissue damage. Research has shown that **Sel-Plex®**, an organic form of selenium, is more readily absorbed and retained than selenium in inorganic forms. **Sel-Plex®** is the ONLY organic selenium to be reviewed by the FDA (Food and Drug Administration).

BIOPLEX®

Bio-available Trace Minerals – or chelated minerals are those that have been bonded to two or more amino acids. A mineral in this chelated state allows easy passage through the intestinal wall into the blood resulting in increased metabolism of that mineral. **dac® TOTAL PERFORMANCE PLUS** utilizes organic minerals to increase availability and enhance absorption rates.

Glucosamine HCL - is required by the body for the synthesis of an important family of macromolecules called glycosaminoglycans (GAGs). These GAGs make up many body tissues including tendons, ligaments, and cartilage. The lack of glucosamine in the joints may lead to specific tissue weakness.

Methylsulfonylmethane (MSM) - is a source of bio-available sulfur. Sulfur plays a critical role in the synthesis of connective tissues, hormones and essential amino acids. Scientific research suggests that MSM may also have anti-inflammatory properties.

Chondroitin Sulfate – is a glycosaminoglycan (GAG) that provides structural components to the articular cartilage matrix and provides protective and nutritive functions to the joints.

Sodium Hyaluronate - is a glycosaminoglycan (GAG) that provides structural components to the synovial fluid and provides protective and nutritive functions to the joints.
